

QGIS Application - Bug report #1234

Suspicious retrival of active layer in dxf2shp converter

2008-08-21 03:36 PM - Mateusz Loskot -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	OS X	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11294
Description		
<p>In file [source:trunk/qgis/src/plugins/dxf2shp_converter/dxf2shpconverter.cpp?rev=9053#L114 dxf2shpconverter.cpp], lines 119-121, there are some actions implemented that seem to be garbage and never used:</p> <pre>[[QgsMapLayer]] *layer = mQGisIface->activeLayer(); if (layer) [[QgsVectorLayer]] *lyr = (QgsVectorLayer*)layer;</pre> <p>Or, it's a kind of logical error (cast and assignment to lyr object in local scope of if-condition) and the idea was to use the retrieved active layer but bits of usage are missing.</p>
