

QGIS Application - Bug report #1235

Invalid multiline string literal in dxf2shp converter

2008-08-21 03:42 PM - Mateusz Loskot -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	C++ Plugins	
Affected QGIS version:		Regression?: No
Operating System:	OS X	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11295
Description		
In file [source:trunk/qgis/src/plugins/dxf2shp_converter/dxf2shpconvertergui.cpp@9053#L129 dxf2shpconvertergui.cpp], in function <i>dxf2shpConverterGui::on_buttonBox_helpRequested()</i>, long multiline string literal is buggy. It should not include semicolon at the end of each line. It makes that each line is a separate exception that has no effect. So, incomplete emessage is printed.
