

QGIS Application - Bug report #12383

max/min values for scale dependent visibility of a layer

2015-03-16 02:00 PM - P. Sydler

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Browser	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 20557
Description		
<p>This bug is related to my prior bug report. I am still working with Windows 8 and QGIS 2.8.1</p> <p>The default value for the maximum visibility of a layer in the layer properties (tab general) is something like -2 147 483 648:1, while the minimum is 1:100 000 000.</p> <p>In my opinion the maximum value should be set to something reasonable like 1:100 000), while the minimum should be set to 1:1.</p>		

History

#1 - 2017-05-01 01:07 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

#2 - 2017-06-04 02:34 AM - Nyal Dawson

- Resolution set to duplicate
- Status changed from Open to Closed
- Description updated

Duplicate of #8546
