

QGIS Application - Feature request #12389

Allow controlling and moving curved labels along line

2015-03-17 03:28 AM - Alexandre Neto

Status:	Open	Resolution: Copied to github as #: 20563
Priority:	Normal	
Assignee:		
Category:	Labelling	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Using data defined properties, it's possible to move and fix label's position by using the move label tool to drag and drop it to the desired position. For horizontal and vertical labels, it works as expected giving the user very nice control over the output.</p> <p>For curved labels, it would be nice if we could control the position of the label on the line, keeping it curved, but fixing its position relatively with the line beginning (or its end). In that case, the move label tool should be able to control a variable containing the label position. moving it back and forward in the line.</p>
