

QGIS Application - Bug report #12410

Application Crash Add vector layer

2015-03-19 07:51 AM - Flo Ju

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Vectors	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 20583
Description		
<p>When adding a vector layer with source type Directory and Type "OpenFileGDB" the application crashes everytime. A mini dump ist written to the local temp Folder. It was too big to upload here.</p> <p>The application is installed on a virtualized Windows Server 2008R2. It was no Problem with Version 2.4 on the same System.</p> <p>Opening the file on a local Installation is also no Problem.</p>

- Status changed from Open to Feedback
- Category set to Vectors

I cannot confirm (qgis 2.8.1, win7 64bit) testing with file geodatabases from here

<http://gapanalysis.usgs.gov/padus/data/download/>

please attach a sample of the problematic data.
