

QGIS Application - Bug report #12422

Attribute column filter turns into extended filter

2015-03-20 03:07 PM - marisn -

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Attribute table	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20594
Description Steps to reproduce: <ul style="list-style-type: none">- open attribute table;- select a column from the column filter;- type in a search term and press "apply";- observe how column filter is replaced by "extended filter". <p>As I had a (boring) repetitive task "copy attribute", "search", "check found object", "repeat", this issue was really annoying in comparison of previous QGIS releases, where column filter was all the time just a column filter and I could just copy/paste values for fast searching.</p> <p>QGIS_column_filter1.png QGIS_column_filter2.png</p>

Revision 383fc055 - 2016-05-23 04:26 PM - Nyal Dawson

Don't automatically turn column filter to extended filter

Now fields using text edit widgets will keep the column filter as the entered text.

Additionally, the extended filter has been improved to always take the initial filter from the current filter, even if it's not an extended filter.

(fix #12422)
