Same problem with "mean and standard deviation plot". It works with numeric value.

#2 - 2015-03-22 03:01 AM - Giovanni Manghi

- Operating System deleted (Mint)

- OS version deleted (17)

- Affected QGIS version changed from 2.8.1 to master

How you can draw plot when both fields (mean and stddev, name and value) contains strings or dates?

Maybe I miss something. What kind of feedback is needed ?

Thanks
Luca

still valid on master.

I don't think this is a bug. To plot we need two sets of numbers: one for X values and second for Y. How we can create plot if X or Y values are strings?

I can change algorithms to disable non numeric fields, if this helps.
