

QGIS Application - Bug report #12429

Run only the selected part of a SQL query

2015-03-23 02:25 AM - Etienne Trimaille

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch applied:	Yes	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20600
Description		
<p>In the DB Manager, since 2.8, you can now run only the selected part of a sql query. This feature works only with the "execute" button to see the table in the window. You can't load the selected part in QGIS or save the selected part in a preset.</p> <p>This PR [1] on the master branch should fix this when you are using the "load in qgis" button and then you save the query in a preset.</p> <p>1 : https://github.com/qgis/QGIS/pull/1955</p>

Can you please review these two PR ?

The PR above 1955 was too old to be merged automatically. I had some conflicts and it was easier to start a new one.

2.9 : <https://github.com/qgis/QGIS/pull/1999>

2.8.2 : <https://github.com/qgis/QGIS/pull/2000>

This feature was in the 2.8 changelog, that's why there is also a backport.

#2 - 2015-05-14 03:02 AM - Giovanni Manghi

- Target version changed from Version 2.8.2 to Version 2.10

#3 - 2015-05-14 10:35 AM - Etienne Trimaille

Let me know if there is a problem with these two PR.
Can you please review them ? 2.8.2 is already out.
