

QGIS Application - Bug report #12440

QGIS server: GetPrint command bbox problem

2015-03-24 09:57 AM - Andreas Neumann

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 20609
Description		
With current master, the GetPrint command has a regression. With the following extent parameter: extent=696390.2,245232.4,696579.2,245479.4 it reports the following error: <pre><ServiceExceptionReport xmlns="http://www.opengis.net/ogc" version="1.3.0"> <ServiceException code="InvalidParameterValue">Invalid BBOX parameter</ServiceException> </ServiceExceptionReport></pre> It probably has to do with the most recent QGIS server commits where bbox stuff was changed on March 20, 2015.
