```

ok it worked, but the apache configuration file will be updated in the osgeo4w installer or is something that will be needed to always do manually? cheers!

Note for others who may encounter this issue.

The line to add is

```
DefaultInitEnv PYTHONHOME "C:/OSGeo4W/apps/python27"
```

in

```
c:\osgeo4w\httpd.d\httpd_qgis.conf
```
