

QGIS Application - Bug report #12477

removing programmatically generated field while attribute table is open crashes QGIS

2015-03-30 08:19 AM - Marco Bernasocchi

Status:	Closed	
Priority:	High	
Assignee:		
Category:		
Affected QGIS version:	2.8.1	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 20625
Description		
Hi, when doing the following I can consistently crash qgis: - load shp - open attribute table - programmatically add a field do the SHP - remove a field using the attribute table GUI the attached script crashes qgis 2.8.1 when executed in the python console.
