QGIS Application - Bug report #12494
value relation widget, wrong sorting of text

2015-04-01 11:55 AM - Giovanni Manghi

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Edit widget		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	end of life
Crashes QGIS or corrupts data:		**Copied to github as #:**	20640

Description

when a value relation is set, if a entry starts with an accented letter, then in the combo box this entry will show at the bottom of the list.

There is also a general issue with lists of numbers in the widgets, that are treated always as text, and this hurts quite a lot the usability of such tools.

History

- Status changed from Open to Feedback

What's shown in the combobox is supposed to be a description for the key used in the attribute. Isn't using a number as description and edge case?

#2 - 2015-06-11 07:30 AM - Giovanni Manghi

- Status changed from Feedback to Open

- Affected QGIS version changed from 2.8.1 to master

but what about if the user "just" needs a combobox to allow choose quickly (and without errors) among a list of specific numbers? this is not an edge situation at all, and as it is now the user creates this list in the "value" column and gets a list that is ordered as text.

#3 - 2017-05-01 01:07 AM - Giovanni Manghi

- Regression? set to No

- Easy fix? set to No

#4 - 2019-03-09 04:09 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed
