History

- Status changed from Open to Feedback

on a Linux system with GRASS7 installed, using the GRASS7/Processing v.sample tool, is all ok. Not sure if/why we should worry anymore about GRASS
6 now that 7 is out and is already supported in Processing.

- Status changed from Feedback to Open

Further tests: it is working in a simpler setting.

IMHO GRASS 6 support should not be dropped anytime soon, as G7 is still unavailable on several platforms.
