

QGIS Application - Bug report #12515

Missing connection error not handled properly when downloading models

2015-04-06 09:11 AM - Paolo Cavallini

Status:	Closed	
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/Modeller	
Affected QGIS version:	2.8.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 20660
Description		
If I try to download sample models from Processing when no connection is available, a raw error is displayed (see below). This should be handled, and the user should be presented with a "Broken connection" understandable error message. Traceback (most recent call last): <pre>File "/home/paolo/.qgis2/python/plugins/processing/gui/ProcessingToolbox.py", line 219, in executeAlgorithm action.execute() File "/home/paolo/.qgis2/python/plugins/processing/gui/GetScriptsAndModels.py", line 77, in execute dlg = GetScriptsAndModelsDialog(GetScriptsAndModelsDialog.MODELS) File "/home/paolo/.qgis2/python/plugins/processing/gui/GetScriptsAndModels.py", line 124, in __init__ self.populateTree() File "/home/paolo/.qgis2/python/plugins/processing/gui/GetScriptsAndModels.py", line 140, in populateTree resources = readUrl(self.urlBase + 'list.txt').splitlines() File "/home/paolo/.qgis2/python/plugins/processing/gui/GetScriptsAndModels.py", line 90, in readUrl return urllib2.urlopen(url).read() File "/usr/lib/python2.7/urllib2.py", line 154, in urlopen return opener.open(url, data, timeout) File "/usr/lib/python2.7/urllib2.py", line 431, in open response = self._open(req, data) File "/usr/lib/python2.7/urllib2.py", line 449, in _open '_open', req) File "/usr/lib/python2.7/urllib2.py", line 409, in _call_chain result = func(*args) File "/usr/lib/python2.7/urllib2.py", line 1240, in https_open context=self._context) File "/usr/lib/python2.7/urllib2.py", line 1197, in do_open raise URLError(err) URLError:</pre>
