

QGIS Application - Feature request #12526

Improve error message when connecting to a postgres database with no postgis extension

2015-04-07 08:04 AM - Olivier Dalang

Status:	Closed	Resolution: Copied to github as #: 20670
Priority:	Normal	
Assignee:	Jürgen Fischer	
Category:	Data Provider/PostGIS	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Hi,</p> <p>Currently, when trying to connect to a postgres database with no postgis extension installed, QGIS gives an "Connection failed: check settings and try again" message. Makes the user think he got something wrong with the host, port, or user settings... while he just needs to run "CREATE EXTENSION postgis;" to make everything work !</p> <p>A message saying that the connection was successful but the postgis extension missing would be much more informative.</p> <p>Thanks !</p> <p>Olivier</p>
