

QGIS Application - Bug report #12529
getFeature() expression not working with geometryless tables

2015-04-08 06:08 AM - zicke -

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Expressions	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 20673
Description		
Hi		
I'm using the getFeature('liegenschaften_grundstueck', 't_id', liegenschaft_von) expression to label a layer. If the layer 'liegenschaften_grundstueck' is a geometryless postgresql layer some errors in the message log will be thrown and the layer is not labeled:		
1 cursor states lost.		
SQL: DECLARE qgis_178 BINARY CURSOR FOR SELECT		
"t_id", "entstehung"::text, "nbident"::text, "nummer"::text, "egris_egrid"::text, "gueltigkeit"::text, "gueltigkeit_txt"::text, "vollstaendigkeit"::text, "vollstaendigkeit_txt"::text, "art"::text, "art_txt"::text, "gesamtflaechenmass"::text FROM "test2"."liegenschaften_grundstueck"		
WHERE (st_srid(""))=-2147483648)		
Result: 7 (ERROR: zero-length delimited identifier at or near ""		
LINE 1: ...est2"."liegenschaften_grundstueck" WHERE (st_srid(""))=-21474...		
^		
)		
2015-04-08T15:01:28 1 Query: CLOSE qgis_178 returned 7 [ERROR: cursor "qgis_178" does not exist		

History

#1 - 2015-04-08 10:17 AM - Jürgen Fischer

- Status changed from Open to Feedback

Did you add the layer via browser (instead of "add postgis layer")? Then commit:d6e22af might have already fixes this.

#2 - 2015-05-10 06:06 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

closing for lack of feedback.
