Affected QGIS version:	2.8.1		**Regression?:**	No
Operating System:	Windows		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	20698

Description

Hello,
I try to do a marker line and I need to set size of marker from attirbute. When I set it, there is no visible marker(just simple point). On pictures are shown details of settings. When attibute size is used, there is only small start point of each marker. When I set the size to tegular number by expression (3rd picture) everything works.
Thanks
B.

History

#1 - 2015-05-10 01:03 AM - Giovanni Manghi

- Target version changed from Version 2.8.1 to Version 2.8.2

#2 - 2015-05-14 03:02 AM - Giovanni Manghi

- Target version changed from Version 2.8.2 to Version 2.10

#3 - 2015-11-03 06:16 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

This was fixed in 2.8.2
