Description

1. add a vector map

2. query a feture

3. select a row with an atribute

4. you can't copy it and paste to another app; too bad

You can now.

Select how many features you want in the canvas or in the attribute table, ctrl-c or select edit-> copy features and then paste where you need. It produces a csv using a "tab" as field separator.

I'm not sure when this feature was implemented, but works in qgis >= 1.1
