Pull Request or Patch supplied:	No		**Resolution:**	invalid
Easy fix?:	No		**Copied to github as #:**	20815

Description

An option to resize the "handle bad layers" window would be nice. I often have problems finding layers when I decide to move something because I cannot see the whole path in this window.It's possible to move the boundaries of the columns, but for high screen resolutions this would be a nice thing to have.

Hi

It's already possible to enlarge the whole dialog. Just need to pick it in the blue border and you can resize it. (unless I misunderstood your request)

#3 - 2015-05-13 01:25 AM - Lars Scharfenberg

OK, sorry, my fault, I missed that, you can close this ticket.

#4 - 2015-05-13 01:47 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed
