QGIS Application - Bug report #12712
Composer map doesn't rotate when angle is set using "data define override" option

2015-05-07 09:18 AM - Harrissou Santanna

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	2.8.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	20818

Description

Create a print composer
Add a composer map
In its main properties, add a value in the map rotation spinbox. The map should rotate.
Now set 0° in the spinbox and try to define a value through "data defined override" option. Whatever is the value you enter, nothing happens. Map won't rotate.
I don't know if this is related but while reading the description, the format of the input is supposed to be like this **double [<= 0.0 =>]** where all the other rotation spinboxes in map composer ask for **double [-180.0 - 180.0]** (even though this is not followed, see #12696)

History

#1 - 2017-05-01 01:07 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#2 - 2017-12-19 12:03 AM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

- Description updated
