| **Pull Request or Patch supplied:** | No | **Resolution:** | fixed/implemented | |
| **Crashes QGIS or corrupts data:** | No | **Copied to github as #:** | 20933 | |

**Description**

See the attached screencast.

If you play around enough is pretty easy also to get a crash.

**History**

**#1 - 2015-05-28 03:06 AM - Jürgen Fischer**

Any output in the log window?  .oO(why was the tooltip that notifies you that there is new output in the hidden log window removed again?)

**#2 - 2015-05-28 03:19 AM - Giovanni Manghi**

*- Resolution set to invalid*

*- Status changed from Open to Closed*

forget about it, it happens with just one specific vector that maybe has problems of its own. I tested other random layers from different datasources and is ok.

**#3 - 2015-05-28 04:17 AM - Giovanni Manghi**

*- Resolution deleted (invalid)*

*- Status changed from Closed to Reopened*

I have to reopen it, just replicated on a newly created shapefile. No messages in the qgis log.

**#4 - 2015-05-29 08:06 AM - Matthias Kuhn**

Any chance to get a stack trace?

**#5 - 2015-05-29 08:19 AM - Marco Hugentobler**

*- Assignee set to Marco Hugentobler*

**#6 - 2015-05-30 11:38 PM - Giovanni Manghi**

*- Status changed from Reopened to Closed*

*- Resolution set to fixed/implemented*

I updated to the latest master and can't see this anymore.
