Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 20945
Description QGIS crashes ungracefully when a python expression script contains an error. I think there should be a warning but the crashes should be avoided. Crash log from my OSGeo4W install is here: https://dl.dropboxusercontent.com/u/42637169/qgis-20150530-140918-3584-680-a9aade2.dmp
