

QGIS Application - Bug report #12891

QGIS Won't Open

2015-06-05 07:43 AM - Amy Butler

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>		
<b>Affected QGIS version:</b>	2.8.1	<b>Regression?:</b> No
<b>Operating System:</b>	Windows 64-bit	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 20981
<b>Description</b>		
<p>QGIS 2.8.1 Wien has always opened for me. Opening it today leaves the "Setting up GUI" image lingering on my computer for hours. When I click on the application's start image it simply says the QGIS crash bin isn't responding. While this is happening, the application does not show up in Task Manager.</p> <p>This was reproduced several times, and even after a completely new re-install of QGIS and a system re-start.</p> <p>Is there any way I can fix this?</p>

- Priority changed from Severe/Regression to Normal
- Status changed from Open to Feedback
- Category deleted (GUI)

Could you rename your .qgis2 folder under your user folder and try to open QGIS again?

#2 - 2015-06-08 01:00 AM - Amy Butler

- % Done changed from 0 to 100
- Status changed from Feedback to Closed

The re-naming did not work, but I installed 2.8.2 and it is functioning well so far. Thanks for helping!

#3 - 2015-06-08 01:02 AM - Giovanni Manghi

- Resolution set to invalid
