

QGIS Application - Bug report #12910

Move rotated canvas with arrow keys according to rotation

2015-06-08 07:29 AM - Bernd Vogelgesang

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Canvas	
Affected QGIS version:	2.8.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 20999
Description		
<p>Happily using the new rotatable maps canvas for digitizing scanned and overcrowded field maps with a lot entries in different orientations, the shifting of the map up/down/left/right with the keyboard arrow keys still follows the original orientation. So a map rotated 180 degree will shift up when pressing down key etc.</p> <p>In my opinion, the arrow keys should adopted to the rotation. If this is intentional, please regard this then as a feature request ;)</p>
