

QGIS Application - Bug report #12912

Switching line/area measure do not remove lines/areas on close

2015-06-08 09:01 AM - Klas Karlsson

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:	Linux Ubuntu / QGIS	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 21001
Description If I measure a line, and then without closing the dialogue, switch to measure an area (or vice versa) the dialogue changes. When I close the new dialogue, the first line remains and can not be removed unless I first reopen line measurement, and then close that dialogue. When measuring angles, the lines (angle lines) disappear when I select line- or area measurement, as it should. This is the same in 2.8.2 as it is in Master. It's probably not a "bug", but I find it a little annoying, now when it occurred to me. Suggest solving it by deleting lines/areas when the dialogue closes either by the button or by other dialogues opening (compare angle measurement).
