

QGIS Application - Bug report #12957

Feature count doesn't show correct values for PostGIS layers after deleting features

2015-06-13 01:53 PM - Paul Kanelli

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 21036
Description		
<p>When creating a PostGIS table (point geometry) in the "DB Manager" and adding three geometries with the QGIS "Add Feature" tool "Count Feature" is working properly. But after deleting all geometries and saving the edit "Count Feature" says there are six geometries.</p>

Revision 361857b0 - 2015-06-29 10:33 PM - Jürgen Fischer

postgres provider: fix feature count on delete (fixes #12957)

(cherry picked from commit 37ed83905f3b81ecd778c5abb1703805ce34666b)

History

#1 - 2015-06-14 01:11 AM - Giovanni Manghi

- OS version deleted (15.04)
- Operating System deleted (Ubuntu)
- Subject changed from Feature count doesn't show correct values for PostGIS layers to Feature count doesn't show correct values for PostGIS layers after deleting features

Confirmed on postgis (not on shapefiles): after clicking "save" the number of features deleted is added to the feature count and not removed.

#2 - 2015-06-14 02:02 AM - Jürgen Fischer

- Status changed from Open to Closed

Fixed in changeset commit:"37ed83905f3b81ecd778c5abb1703805ce34666b".
