QGIS Application - Bug report #12971
Set the CRS of Dataset

2015-06-15 07:28 AM - Peter Drexel

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	2.8.2	**Regression?:**	No	
Operating System:	Windows	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	21049	

Description

IF I load a Dataset without a proper CRS-set to it Qgis asks me to choose one.

When I CANCEL the "Select CRS"-Dialog then WGS84 (EPSG 4326) is applied to the dataset and it is still loaded.

I think the propper way of handling the Cancel-Event would be not to load the dataset.

Thanks

Peter
