

QGIS Application - Feature request #12991

"build virtual vector": add option to allow add the layers as "unioned"

2015-06-18 04:18 AM - Giovanni Manghi

Status:	Closed	Resolution: Copied to github as #: 21069
Priority:	Normal	
Assignee:	Victor Olaya	
Category:	Processing/QGIS	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
The vrt created by the tool does not have the <pre><OGRVRTUnionLayer></pre> tag that allows load the layers inside the vrt as one unique layer. It would be nice to have it as option. example <pre><OGRVRTDataSource> <OGRVRTUnionLayer name="UnionedLayer"> <OGRVRTLayer name="caop_2013_costa"> <SrcDataSource relativeToVRT="0" shared="1">/home/giovanni/caop_2013_costa.shp</SrcDataSource> <SrcLayer>caop_2013_costa</SrcLayer> <GeometryType>wkbPolygon</GeometryType> </OGRVRTLayer> <OGRVRTLayer name="caop_2013"> <SrcDataSource relativeToVRT="0" shared="1">/home/giovanni/caop_2013.shp</SrcDataSource> <SrcLayer>caop_2013</SrcLayer> <GeometryType>wkbPolygon</GeometryType> </OGRVRTLayer> </OGRVRTUnionLayer> </OGRVRTDataSource></pre>
