Assignee:			
Category:	Vectors		
Affected QGIS version:	2.8.2	**Regression?:**	No
Operating System:	windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	not reproducable
Crashes QGIS or corrupts data:		**Copied to github as #:**	21072

Description

i tried to open a 2.2 GB in QGIS, and not all the ways are loading, making me think that the file is corrupt.

After spending 8 hours debugging, i figure it out that the problem is from QGIS, not my dataset

i tried with a 80 mb osm.pbf file , and all the ways are open in qgis.

the osm.pbf file that i loaded is a list of all te ways in germany
