

QGIS Application - Bug report #12996

Regression - Wrong default values on feature attributes edit form

2015-06-18 08:07 AM - Antoine EDENN

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Jürgen Fischer	
Category:	Data Provider/PostGIS	
Affected QGIS version:	master	Regression?: No
Operating System:	Win 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 21074
Description QGIS 2.9 have a problem with edit form default values when you load table from postgres. QGIS recognize correctly data definition in propriety widget but not in feature attributes edit form. Steps to reproduce: 1) create table in postgres like this : CREATE TABLE public.t_sdaer_entree_champ (id serial primary key, the_geom geometry(Point,2154), source_releve character varying(50) DEFAULT 'EDENN':character varying, ddate date DEFAULT now(), duser character varying(255), commentaire text, source_donnee character varying(50) DEFAULT 'ortho IGN 2012':character varying) 2) load table in QGIS 3) edit table and add new feature Problem: Default box for fields are not correctly reported: 'source_releve' default value is not reported 'ddate' use 'source_releve' default value ... (see attached picture) It's a regression because QGIS 2.8 is not affected. Windows 7 64bit desktop Postgres 9.4 on Windows 7
