

QGIS Application - Bug report #1300

corrupted display when moving vertices

2008-09-07 06:23 AM - Maciej Sieczka -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Digitising	
Affected QGIS version:		Regression?: No
Operating System:	Debian	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11360
Description		
In trunk r9278 the "Move vertex" digitizer tool behaves strange. Instead of morphing the polygon shape as I drag a vertex, a strange red line is rendered from canvas bottom following cursor moves. See the attached screendump or whatch the problem live http://www.sieczka.org/tmp/qgis_digitize_red_line.html (a Flash screenkast). Debian testing amd64, QT 4.4.0.
