#### History

##### #1 - 2008-09-08 02:22 AM - Jürgen Fischer

- Status changed from Open to Closed
- Resolution set to invalid

Sounds like an OS restriction to me. On Linux I'd inspect the setting of ulimit -n and raise it. Looks like OSX has a similar setting:

<http://kasei.com/pipermail/plucene/2004-March/000089.html>

##### #2 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted

##### #3 - 2012-02-05 11:22 AM - Jürgen Fischer

- Pull Request or Patch supplied set to No
- Assignee deleted (nobody -)
- Crashes QGIS or corrupts data set to No
- Affected QGIS version set to master

That link is broken. <http://usrinapto.wordpress.com/2010/03/06/mac-os-x-10-6-max-open-files-too-many-open-files/> has another description how to

increase the open file limit on OSX.
