<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 21104
<b>Description</b>		
Created a project in Master on Ubuntu 14.04 - SVG symbols are almost all white with some random ones being black - so you can see them. I haven't checked windows master currently.		

#### History

##### #1 - 2015-07-31 11:52 AM - Giovanni Manghi

- OS version deleted (Master on Ubuntu 14.04 )
- Operating System deleted (Ubuntu 14.04 )
- Target version deleted (Version 2.10)

##### #2 - 2015-10-02 03:33 PM - Randal Hale

- Status changed from Open to Closed

Old - should have been closed. It's Fine now. Thanks to whoever fixed it.

##### #3 - 2015-10-08 07:01 AM - Randal Hale

- Status changed from Closed to Reopened
- Target version set to Version 2.12

So I looked at the wrong thing. Ha. That will teach me to make better notes. On the layer properties ->style ->svg symbols most of the symbols are white with a few that are black. Most (90%) are not visible. Haven't checked this on Windows yet.

##### #4 - 2015-10-09 08:09 PM - Nyall Dawson

- Status changed from Reopened to Closed
- Resolution set to duplicate

Duplicate of #10908 - did you forget you filed that one? ;)

##### #5 - 2015-10-10 05:51 AM - Randal Hale

What - me make a mistake - that's impossible. Ha. I kept thinking I had reported this one and there we go. So sorry about that one.
