QGIS Application - Bug report #1304
Image export dialog uses wrong file name on changing image type

2008-09-09 05:56 AM - cmoe -

Affected QGIS version:		**Regression?:**	No	
Operating System:	RedHat	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed	
Crashes QGIS or corrupts data:		**Copied to github as #:**	11364	

Description

The image export dialog in the print composer opens always with the last file exported as suggestion (eg. 'foo.tif'). If I am changing the image type now, let's say to a png, the file name field says 'foo.png'. This is correct, but if I save it now, the file name will be still 'foo.tif'.

I guess, the problem is, that the focus all the time lays on the last suggestion in the file/directory part of the dialog, where this last suggestion ('foo.tif') is marked.

It works if I write anything in the file name field (e.g. delete the 'g' on 'foo.png' and add it again). Also the 'foo.tif' isn't marked any longer.

History

#1 - 2008-09-11 05:46 AM - Marco Hugentobler

- Resolution set to fixed

- Status changed from Open to Closed

A fix for this is in commit:8552d60b (SVN r9300)

#2 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted
