| Affected QGIS version: | 2.8.2 | Regression?: No |
| Operating System: | | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: not reproducible |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 21147 |
| Description | | |
| <p>Because i am not sure what should be changed, the title is "Postgis Hstore Postgresql osm.pbf file osmosis auto convert"</p> <p>Basically, converting with osmosis the osm file is pointless if i want to filter something and see the result in QGIS, because Qgis show only the Raw hstore tags value, that from what i know, you cannot do nothing to them.</p> | | |
