Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 21173
Description	
<p>When choosing a 'Web view' or 'Photo' field format in the design of a form, the photo is displayed as well as its url/path. This should be optional: it should be possible to display both the photo and its address (like currently), only the photo or only the address (especially when the field is editable of course).</p> <p>I think that most of the time displaying the url below the photo is useless.</p> <p>See the discussion about forms and fields here : https://github.com/qgis/QGIS-Enhancement-Proposals/pull/13</p>
