

QGIS Application - Bug report #13126

segfault in 2.8 branch (pre 2.8.3)

2015-07-17 12:10 AM - Sandro Santilli

Status:	Closed	
Priority:	High	
Assignee:		
Category:		
Affected QGIS version:	2.8.2	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 21191
Description		
I got a segfault while doing nothing. It might have been on exit, in case I accidentally sent a kill message (but I don't remember having done so). Luckily I got a core dumped, but the backtrace isn't very useful to me, except it has to do with threads, maybe: <pre>Reading symbols from /usr/src/qgis/build/2.8/output/bin/qgis...done. [New LWP 26580] [New LWP 26590] [New LWP 26579] [New LWP 26578] [New LWP 26571] [New LWP 26569] [New LWP 26570] [Thread debugging using libthread_db enabled] Using host libthread_db library "/lib/x86_64-linux-gnu/libthread_db.so.1". Core was generated by `usr/src/qgis/build/2.8/output/bin/qgis /home/strk/Desktop/city_data.qgs'. Program terminated with signal SIGSEGV, Segmentation fault. #0 0x00007fef02a15c8e in ??
