

QGIS Application - Feature request #1317

Canceling all when loading project with broken links

2008-09-16 11:18 AM - Maxim Dubinin

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GUI	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11377
Description When loading project with multiple links to layers, that are broken (i.e. the project is sent from somewhere else), QGIS allows to navigate for the correct location. It would be nice to have Cancel All button to restore the project itself quicker, without loading all the layers (or cancelling them), especially when number of layers is large.
