QGIS Application - Bug report #13186
Qgis Unable to export A0 300 dpi image - memory overflow notification

2015-08-05 11:00 AM - baditaflorin -

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Map Composer/Printing		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	end of life
Crashes QGIS or corrupts data:		**Copied to github as #:**	21248

Description

When i do :
"To create image 28086x19866 requires about 1673 MB of memory. Proceed?"

I get :
"Trying to create image #1(28086x19866 @ 300dpi) may result in a memory overflow.
Please try a lower resolution or a smaller papersize"

At 250 dpi it`s working

To create image 23405x16555 requires about 1162 MB of memory. Proceed?

I need to print/export bigger sizes
