

# QGIS Application - Bug report #13193

## The site ahead contains harmful programs

2015-08-07 01:57 AM - baditaflorin -

<b>Status:</b> Closed	
<b>Priority:</b> Severe/Regression	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b> windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 21254
<b>Description</b>	
The site ahead contains harmful programs	
Attackers on <a href="http://www.qgis.org">www.qgis.org</a> might attempt to trick you into installing programs that harm your browsing experience (for example, by changing your homepage or showing extra ads on sites you visit).	

### History

#### #1 - 2015-08-07 03:24 AM - baditaflorin -

In google chrome

#### #2 - 2015-08-08 12:02 AM - Richard Duivenvoorde

Via an online scanner found out that raw.githubusercontent.com is blacklisted.  
We get some images from them (the splash image)...

Ok, fully removed qgis website yesterday, and clean rebuild it after removing references to raw.githubusercontent.com...  
Asked for a review..

This morning:

[www.qgis.org](http://www.qgis.org) should be ok now (but "As a result, we're removing the malware warning from your site. This may take some time to happen").

[www.qgis.org/pyqgis-cookbook](http://www.qgis.org/pyqgis-cookbook) 'still infected' (again NO hints, do not know where to look for...)

#### #3 - 2015-08-21 05:49 AM - Jürgen Fischer

- Resolution set to fixed/implemented
- Status changed from Open to Closed
