

QGIS Application - Feature request #13229

Lock the length of Scale bar

2015-08-18 08:41 PM - Adi Kurniawan

Status:	Closed	Resolution: fixed/implemented Copied to github as #: 21290
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>Dear All,</p> <p>Until this version, I still not find a parameter to set the length of a scale bar. In my expectation, the length scale bar can be controlled by the user, so user has an ability to set the nice view of a scale bar.</p> <p>It's also will be benefit for the user that set the scale bar automatically in the map template.</p> <p>So, if the user will zoom in or zoom out the area, the length of a scale bar not change.</p> <p>Thank you.</p>		

History

#1 - 2015-08-20 01:07 PM - Anita Graser

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- File Screenshot_2015-08-20_22.07.02.png added

This is already implemented in 2.10: use "fit segment width", see attached screenshot
