

QGIS Application - Bug report #13294

WMS extent/coordinates wrong on Windows

2015-08-31 09:31 AM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	master	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 21352
Description There is something wrong with the extent/coordinates with QGIS Server WMS on Windows. Steps: <ul style="list-style-type: none">- create a project in WGS84 with the following sample layer :https://github.com/qgis/QGIS-Web-Client/raw/master/data/HYP_50M_SR_W.tif- configure the project in "OWS properties" where "advertised extent" is only a portion of the above layer- create the connection and add the layer as WMS layer: the layer shows (more or less) 0,0 this used to work as expected in the recent past. Tested on qgis server 2.8.9 and 2.14 development branch and master.

History

#1 - 2015-10-05 04:40 AM - Jürgen Fischer

- Subject changed from QGIS Server WMS extent/coordinates wrong on Windows to WMS extent/coordinates wrong on Windows

#2 - 2016-04-09 08:52 AM - Giovanni Manghi

maybe related to #14589 and #13762

#3 - 2016-07-02 01:17 PM - Giovanni Manghi

- Operating System set to Windows
- Affected QGIS version changed from 2.10.1 to master
- Target version changed from Future Release - High Priority to Version 2.16

Still true.

| Still true.

not related anyway to the "Cannot calculate extent" problem.

#5 - 2017-03-03 04:27 AM - Giovanni Manghi

- *Status changed from Open to Closed*
- *Resolution set to fixed/implemented*

works as expected on qgis server 2.18.4
