

QGIS Application - Bug report #13305

Layout templates drawback

2015-09-01 03:05 AM - Per Gammerath

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.10.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 21363
Description		
<p>In the Map Composer you can save Layout Templates, but you can not load them. You can only load the Items from a template. How can this be?</p>		

History

#1 - 2015-09-01 07:16 AM - Harrissou Santanna

The load template function has been moved for many releases.

Adding items from the template allows you to keep some customization of the print composer (ie, paper sizes, other items) and add items from the template.

But if you want the print composer to look like your template, it has to be done in composer manager dialog. You can load template while creating a new composer, using existing templates in the drop down menu. You need to add your template in default folders or set it specifically.
