QGIS Application - Feature request #13326
Utilize SVG parameters in Composer

2015-09-07 05:54 PM - Evan Derickson

Pull Request or Patch supplied:	No	**Resolution:**	duplicate
Easy fix?:	No	**Copied to github as #:**	21380

Description

When using **Add Image** to add an SVG in the print composition, SVG parameters cannot be used. If the item properties exposed these parameters to the user, they could quickly change the stroke, fill, etc of SVGs. This functionality currently exists in Layer Styles for point layers.

Sample use case: changing the fill color of a north arrow.
