

QGIS Application - Bug report #13332

improperly drawn lines may occur on polygon/line features

2015-09-08 12:47 PM - Steven Mizuno

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 21386
Description		
<p>When Settings Options Rendering, Rendering quality: "Make lines appear less jagged at the expense of some drawing performance" is turned OFF there is a line drawing problem for linestring and polygon features where a line is drawn across the map instead of following a series of vertices. This happens when some of the vertices are off-screen.</p> <p>This occurs when the border or pen width is equivalent to less than 1 pixel -- 0.26 mm being the default. On a 96dpi display 1 pixel = 0.26458333 mm, approximately.</p> <p>Changing the line width to 0.264584 (just more than 1 pixel) keeps the improperly drawn lines from appearing.</p> <p>The problem occurs for both the main feature rendering and when the feature is selected. Note that the line width settings don't affect the selection rendering.</p> <p>At first I thought it was related to a particular computer until I realized that another computer with the same version of QGIS was set for 192dpi so the problem showed only sometimes, as when a feature was selected. I changed the line width to 0.13 (less than 1 px) and the problem would occur on this computer as well. Also noticed that 32-bit versions didn't appear to have the problem.</p> <p>On further testing, it appears that the 32-bit versions don't exhibit the problem and that 64-bit versions dating to 2.10 or earlier do have the problem.</p> <p>I consider this to be a relatively minor problem, but it could lead to misinterpreted data.</p> <p>Attached files showing various aspects.</p>		

History

#1 - 2015-11-10 12:26 PM - Steven Mizuno

I believe this has been fixed in master (see #13343 which described a similar problem), so I am closing this issue.
