<b>Pull Request or Patch Supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 21388
<b>Description</b>	
<p>In certain WMS-services, attribute-info comes with a <a href="#">http://-hyperlink</a>. This hyperlink is viewable on the internet en gives you all kinds of data about the object.</p> <p>However, in QGis, the hyperlink stays plain-text. It would be very nice to have this column as a highlighted hyperlink on which you can click and so get the immediate info.</p> <p>The WMS-link I use is <a href="http://geodiensten.gisoost.be/arcgis/services/atlaswaterlopen/Mapserver/WMServer?version=1.3.0x%x%&amp;layer=1950-Waterlopen">http://geodiensten.gisoost.be/arcgis/services/atlaswaterlopen/Mapserver/WMServer?version=1.3.0x%x%&amp;layer=1950-Waterlopen</a>.</p>
