

QGIS Application - Feature request #1334

save areas of polygons and length of lines in defined field in dbf of shapefiles

2008-10-01 12:00 PM - Gerhard Spieles

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	Vectors	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11394
Description		
<p>Hello,</p> <p>in the information popup of polygons or lines you see the result of aerea measurement or line length. Verry often, we need this results as content in a defined field of the dbf file. The dbf files are used also in other programs p.example for calculation etc.</p>

- Resolution set to fixed
- Status changed from Open to Closed

Ftools in now a core plugin. With ftools you can calculate areas/perimeters/lengths and have them added in the attribute tables.

Closing, reopen if necessary.
