QGIS Application - Bug report #13344
Processing Import into PostGIS: list of connection does not refresh

2015-09-11 06:33 AM - Paolo Cavallini

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Processing/OGR		
Affected QGIS version:	2.10.1	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	duplicate
Crashes QGIS or corrupts data:		**Copied to github as #:**	21397

Description

New PoastGIS connections are not listed on the list of connections in the Processing dialog; QGIS has to be restarted to take the new connection into account.

I have noticed this as well since at least 2.6.

Seems odd. The code populates the DB selections from QSettings, which appears to update correctly when I add a new DB. I tested with the following code in the Python console, adapted from the tool's code:

```
from PyQt4.QtCore import QSettings
settings = QSettings()
settings.beginGroup('/PostgreSQL/connections/')
settings.childGroups()
```

(create new db in postgis)

```
settings = QSettings()
settings.beginGroup('/PostgreSQL/connections/')
settings.childGroups()
```
