

## QGIS Application - Bug report #1336

### loading gpx files

2008-10-03 07:06 AM - chris123 -

<b>Status:</b>	Closed	
<b>Priority:</b>	Low	
<b>Assignee:</b>	Magnus Homann	
<b>Category:</b>	Data Provider	
<b>Affected QGIS version:</b>		<b>Regression?:</b> No
<b>Operating System:</b>	Linux	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> worksforme
<b>Crashes QGIS or corrupts data:</b>		<b>Copied to github as #:</b> 11396
<b>Description</b>		
<p>Greetings:</p> <ol style="list-style-type: none"><li>1. Load wms blue marble from lizardtech wms</li><li>2. Load local gpx file as a new layer from menu not pluggin</li><li>3. Save as picture and exit program. Do not save project.</li></ol> <p>Then repeat</p> <p>Regardless of what you call the gpx file it will not accept the file says it already exists but will not render it. Suggests renaming it. This produces no positive outcome.</p> <p>Removing the program with apt and locating all instances of associated files, shutting down the machine and reinstalling qgis 1.1 does not seem to rectify the problem. Upon reinstallation and repeating the steps above the problem persits.</p> <p>System: Linux ubuntu 2.6.24-19-generic #3905 SMP Wed Aug 20 22:56:21 UTC 2008 i686 GNU/Linux</p> <p>qgis:Quantum GIS - 0.11.0-Metis 'Metis' (unknown)</p> <p>Many thanks.</p>		

### History

#### #1 - 2008-10-27 07:17 AM - Magnus Homann

- Status changed from Open to In Progress

Chris, could you explain a bit more in detail how you do steps 2) and 3). I'm not sure I understand what you do.

#### #2 - 2009-01-31 02:42 AM - Paolo Cavallini

- Resolution set to worksforme

- Status changed from In Progress to Closed

It seems to work. Please reopen it is still valid for qgis 1.0

#3 - 2009-08-22 01:01 AM - Anonymous

Milestone Version 1.0.1 deleted
