<b>Description</b>		
Starting from ogr2ogr based tool "Dissolve polygons", it could be useful to have a tool that can dissolve a linear vector layer and sum some attributes of choice.

Hi Bernhard,

I will add ogr/sql tools regardless of the work being done in native qgis tools, for several reasons: I like the flexibility of having GUI tools purely based on spatial SQL queries and because the tools already available have proven to be overall much quicker than the qgis/ftools counterparts. Cheers!
